# USED NOVELTY

This is how creative, lively, and playful interior design can be. The used look meets ornamentation, faded tones meet powerful colours. But the most important thing: It doesn't have to be perfect.

## The passion for wood is in our nature.

Those who deal with wood every day develop a special relationship with nature. The respectful handling of this fascinating raw material has always been the basis of our work. It's evident in the resource-efficient processing as well as in the finished product. For example, we only use timber from regional, sustainable forestry – our cork is also certified. We deliberately do not use plasticisers or PVC. All flooring is free of harmful

substances, even the decorative print of our flooring is based on water-soluble dyes. For this reason, we have been awarded numerous national and international environmental certificates. And healthy living also speaks for our flooring: Anyone who has ever experienced the atmosphere of a room with EGGER Flooring will understand our passion for wood.

Information sur le niveau d'émission de substances volatiles dans l'air intérieur, présentant un risque de toxicité par inhalation, sur une échelle de classe allant de A+ (très faibles émissions) à C (fortes émissions).

All the by-products of production, such as chips and offcuts, are recycled through our sustainable environmental cycle.

## Which type of flooring is right for you?

Whether you will enjoy your flooring for a long time depends not only on its appearance. First, consider in which room the flooring is used and how. Our robust Design Flooring is the best choice for heavily used areas such as the kitchen and hallway. In the bedroom, the Comfort Flooring with sound and thermal insulation creates cosiness. Our Laminate Flooring gains points with its wide range of decor options for your individual living

style. Its five different board formats provide the perfect backdrop for a wide variety of room sizes. For bathroom and toilet, however, we recommend a moisture-resistant solution: our Aqua+ Laminate or the Design Flooring. And, last but not least, the budget determines whether you opt for beautiful, everyday flooring or for special properties. But so much is clear: with an EGGER Flooring you make the right choice.

## Comfortable living begins with the right flooring.

Imagine coming home and immediately feeling this pleasant feeling of cosiness and security. With the EGGER HOME Comfort Flooring you can experience this special moment each and every day. Finished with two comfortable cork layers, our feel-good flooring radiates warmth and comfort. And thanks to its sound-absorbing properties, it's wonderfully suitable for children's rooms, bedrooms and all rooms where you want to enjoy a little quiet moment away from everyday life. Living can be so comfortable.

Dekor: Dub Fortland biely | EHC023

## Warm, soft, quiet.

### Heat storage

As soon as you enter the room, you feel the cosy atmosphere. The flooring feels warm and comfortable as the cork stores heat in millions of small air cells.

### Barefoot area

Just take off your shoes and walk barefoot. The elastic cork layers transmit a gentle, soft feeling and invite you to sit comfortably on the floor.

### Quiet zone

If you like it quieter: The two cork layers and special environmentally friendly varnishes literally swallow the sound in the room and create a quiet ambience.
